

The 40 Drum Rudiments

R = right hand · L = left hand · lowercase l / r = grace note (one for a flam, two for a drag) · "." separates the right-hand-lead and left-hand-lead versions. Practice slowly and evenly before building speed.

How to practice rudiments

A one-page plan you can use with any practice pad and a metronome.

The routine

- **Pick two or three rudiments** per week. Start with the single stroke roll, double stroke roll, single paradiddle and flam.
- **Start slow.** Play each one evenly at a tempo you can keep clean, often 60 to 80 BPM.
- **Open, closed, open.** Build from slow to the fastest tempo you can control, then come back down without losing evenness.
- **Match your hands.** Same stick height and volume on both. Accent only where the rudiment calls for it.
- **Use a metronome** and listen for rushing on the fast parts and dragging on your weaker hand.
- **Short and daily** beats long and rare. Ten to twenty focused minutes is plenty.

A simple tempo ladder

STEP	TEMPO	GOAL
1	60 BPM	Perfectly even, relaxed grip
2	80 BPM	Same evenness, clean accents
3	100 BPM	Hold it for two full minutes
4	120 BPM	Stay relaxed; stop if tension creeps in
5	Back to 80 BPM	Is it still as even as before?

Get real timing feedback. DrumPulse turns your Apple Watch into a drumming timing coach. Wear it on one wrist, play a rudiment on a pad to a metronome, and see whether that hand is rushing or dragging, how steady it is, and how even your touch is. Every session also saves to Apple Health as a workout, so rudiment practice counts as cardio.
